PRATIK PATIDAR

Frontend Engineer | React.js • Next.js • TypeScript • SvelteKit • Tailwind CSS

Indore, Madhya Pradesh, India • pratikpatidar7990@gmail.com • +91 8269647990 • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Frontend engineer with around 2 years of experience in React, Next.js, SvelteKit and TypeScript. I mostly build reusable components from Figma designs, connect them to REST APIs and work on load time and scroll performance. I work closely with backend developers and QA, and I have also used MCP, n8n and OpenRouter for a few AI features. Based in Indore and available to join immediately.

TECHNICAL SKILLS

Frontend Core:	TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design
Frameworks:	React.js, Next.js (App Router, SSR), SvelteKit, Redux, Context API, Component Library Design
Performance:	Lazy Loading, Code Splitting, Dynamic Imports, Virtualization, Lighthouse
APIs & Testing:	REST API Integration, HttpOnly Cookie Auth Flows, Jest, React Testing Library, Cross-browser Testing
AI Integrations:	MCP (Model Context Protocol), n8n Workflow Automation, OpenRouter (LLM APIs)
Tools & Workflow:	Git, GitLab CI/CD, Vite, Figma, Postman, Jira, Agile/Scrum, ESLint, Chrome DevTools

PROFESSIONAL EXPERIENCE

Techstuff Private Limited — **May 2025 – Present**

Frontend Engineer (Full-Stack Contributor) — Indore, India

- Build features on Mercanis, a B2B SaaS procurement platform, in SvelteKit and TypeScript, and on the Next.js payroll platform.
- Designed and built a shared component library of 20+ reusable components (forms, tables, modals, navigation) adopted across every module of the Mercanis platform.
- Cut the initial JS bundle size by about 40% with lazy loading, code splitting and dynamic imports, and removed scroll lag on a large scheduling grid with virtualization.
- Synced filters and tabs across the time-tracking pages of the Next.js payroll app to URL query params with a shared hook (debounced search, back/forward safe), so reloads and shared links keep the same view.
- Turn Figma designs into responsive, reusable UI with React/Next.js and SvelteKit, and review each change with senior engineers before merge.
- Implemented frontend authentication: HttpOnly cookie sessions, protected routes and session handling against a NestJS token API.
- Integrate REST APIs into screens, handling auth tokens, loading and error states, validation errors and edge cases agreed with backend developers.
- Shipped 8+ features through Jira, GitLab merge requests and CI/CD, writing test cases and working with QA before each release.
- Added AI features to the payroll platform: an MCP server exposing leave, calendar and candidate tools to AI assistants, and OpenRouter-backed LLM recruitment features replacing n8n workflows.

Techstuff Private Limited — **Feb 2025 – May 2025**

Frontend Developer Intern — Indore, India

- Built React.js/TypeScript UI components from Figma designs; several are still used in the production component library.
- Integrated REST APIs into existing screens and fixed QA-reported bugs, reducing reopened tickets in later sprints.
- Learned the team Git/GitLab workflow (feature branches, merge requests, code review) and was merging production code independently by the end of the internship.

KEY PRODUCTION PROJECTS

Mercanis — B2B SaaS Procurement Platform

Client Project (SvelteKit, TypeScript, REST APIs)

- Core platform used daily by enterprise procurement and supplier-management teams; own frontend features from Figma handoff through REST API integration to release.
- Built a shared component library of 20+ reusable components (forms, tables, modals, navigation) and added virtualization to a large scheduling grid to fix scroll lag.

Enterprise HR & Payroll Platform

Internal Business Application (Next.js, TypeScript, Redux, Context API)

- Build and maintain the Next.js frontend for leave, attendance, calendar and candidate management, using Redux and Context API for state.
- Synced filters and tabs across the time-tracking pages to URL query params, so reloads and shared links keep the same view.

EduMiracle — Student ERP Portal

Personal Project (Next.js 16, TypeScript, Tailwind CSS, Recharts)

- Built solo for a real NEET/JEE coaching institute: live attendance views, Recharts-based mock test analytics and a CBT exam simulator, deployed on Vercel.
- Designed a role-based admin panel and responsive layouts for desktop and mobile.

EDUCATION

Bachelor of Technology in Computer Science & Engineering — **2020 – 2024**

Barkatullah University Institute of Technology (BUIT), Bhopal — **CGPA: 7.89 / 10**
