PRATIK PATIDAR

Full Stack Developer | React.js • Node.js • NestJS • LLM Integration • TypeScript

Indore, Madhya Pradesh, India • pratikpatidar7990@gmail.com • +91 8269647990 • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Full stack developer with around 2 years of experience in React, Next.js, Node.js, NestJS and MongoDB. I build features end to end, and I have also worked on AI features: an MCP server that lets AI assistants use our payroll data, and moving our recruitment features from n8n to OpenRouter-based LLM calls, along with a RAG system. Based in Indore and available to join immediately.

TECHNICAL SKILLS

Frontend:	React.js, Next.js (App Router, SSR), SvelteKit, TypeScript, JavaScript (ES6+), Tailwind CSS, Redux, Context API
Backend & Database:	Node.js, NestJS, REST API Design, MongoDB, Mongoose, JWT Authentication (HttpOnly cookies), OAuth-style Login Flows
AI & Integrations:	LLM API Integration (OpenRouter, Gemini), RAG Systems, Embeddings and Vector Search, Model Context Protocol (MCP), Tool Calling, n8n Workflow Automation, Prompt Engineering
Testing & Performance:	Jest, React Testing Library, Cross-browser Testing, Lazy Loading, Code Splitting, Virtualization, Lighthouse
Tools & Workflow:	Git, GitLab CI/CD, Postman, Jira, Agile/Scrum, Vite, Figma, ESLint, Chrome DevTools

PROFESSIONAL EXPERIENCE

Techstuff Private Limited — **May 2025 – Present**

Frontend Engineer (Full-Stack Contributor) — Indore, India

- Deliver full-stack features across two production products (Mercanis in SvelteKit, Payroll & HR in Next.js), owning the NestJS/MongoDB endpoints and the UI that consumes them; shipped 8+ features through Jira, GitLab merge requests and CI/CD.
- Built an MCP (Model Context Protocol) server on the official SDK, backed by a CLI/loopback OAuth-style login flow (authorize, one-time code, token exchange, refresh) on the NestJS auth service, so AI assistants can query leave, calendar and candidate data through the same authenticated API.
- Moved AI-powered recruitment features (resume parsing and analysis) from n8n workflows to an OpenRouter-backed LLM service inside the NestJS backend, reducing dependence on external automation and keeping the existing AI Interview feature working.
- Cut the initial JS bundle size by about 40% with lazy loading, code splitting and dynamic imports, and removed scroll lag on a large scheduling grid with virtualization.
- Agreed REST API contracts (payloads, validation, edge cases) with backend developers and worked with QA on test cases before every release, keeping releases predictable.

Techstuff Private Limited — **Feb 2025 – May 2025**

Frontend Developer Intern — Indore, India

- Built React.js/TypeScript UI components from Figma designs; several are still used in the production component library.
- Integrated REST APIs into existing screens and fixed QA-reported bugs, reducing reopened tickets in later sprints.
- Learned the team Git/GitLab workflow (feature branches, merge requests, code review) and was merging production code independently by the end of the internship.

KEY PRODUCTION PROJECTS

Enterprise HR & Payroll Platform

Internal Business Application (Next.js, TypeScript, NestJS, MongoDB, MCP, OpenRouter)

- Internal system for leave, attendance, calendar and candidate management; I build and maintain the Next.js frontend and contribute to the NestJS backend, using Redux and Context API for state.
- Added AI to the platform: an MCP server exposing payroll tools to AI assistants, and OpenRouter-backed LLM features for recruitment in place of n8n workflows.

Mercanis — B2B SaaS Procurement Platform

Client Project (SvelteKit, TypeScript, NestJS, MongoDB)

- Core platform used daily by enterprise procurement and supplier-management teams; owned frontend features from Figma handoff to REST API integration and release.
- Designed a shared component library of 20+ reusable components (forms, tables, modals, navigation) adopted across every module.

EduMiracle — Student ERP Portal

Personal Project (Next.js 16, TypeScript, MongoDB, Tailwind CSS, Gemini AI)

- Built solo end to end for a real NEET/JEE coaching institute: live attendance, mock test analytics, a CBT exam simulator and a role-based admin panel, deployed on Vercel.
- Added Gemini AI for real-time doubt solving.

EDUCATION

Bachelor of Technology in Computer Science & Engineering — **2020 – 2024**

Barkatullah University Institute of Technology (BUIT), Bhopal — **CGPA: 7.89 / 10**
