PRATIK PATIDAR

MERN / Full Stack Developer | MongoDB • Node.js • NestJS • React.js • Next.js

Indore, Madhya Pradesh, India • pratikpatidar7990@gmail.com • +91 8269647990 • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Full stack developer with around 2 years of experience working with MongoDB, Node.js, NestJS, React and Next.js. I like owning a feature from start to finish, from the data model and API to the screen and the release. At Techstuff I build HR, payroll and procurement platforms, and I have added a few AI pieces using MCP, n8n and OpenRouter. Based in Indore and available to join immediately.

TECHNICAL SKILLS

MERN Core:	MongoDB, Node.js, NestJS, React.js, Next.js, TypeScript, JavaScript (ES6+)
Frontend:	Next.js (App Router, SSR), SvelteKit, Tailwind CSS, Redux, Context API, HTML5, CSS3
Backend & Database:	REST API Design, Mongoose, Schema Modeling, JWT Authentication (HttpOnly cookies), OAuth-style Login Flows
Testing & Performance:	Jest, React Testing Library, Cross-browser Testing, Lazy Loading, Code Splitting, Virtualization, Lighthouse
AI Integrations:	MCP (Model Context Protocol), n8n Workflow Automation, OpenRouter (LLM APIs)
Tools & Workflow:	Git, GitLab CI/CD, Postman, Jira, Agile/Scrum, Vite, Figma, ESLint, Chrome DevTools

PROFESSIONAL EXPERIENCE

Techstuff Private Limited — **May 2025 – Present**

Frontend Engineer (Full-Stack Contributor) — Indore, India

- Deliver full-stack features across two production products (Mercanis in SvelteKit, Payroll & HR in Next.js), owning the NestJS/MongoDB endpoints and the UI that consumes them.
- Shipped 8+ features through Jira, GitLab merge requests and CI/CD, writing test cases and working with QA before each release.
- Implemented JWT authentication end to end, from NestJS token handling to HttpOnly cookies, protected routes and session handling on the frontend.
- Settle REST API contracts (payload shapes, validation rules, edge cases) with backend developers, then build the NestJS/MongoDB endpoints and the frontend that consumes them.
- Designed a CLI/loopback OAuth-style login flow (authorize, one-time code, token exchange, refresh) on the existing NestJS auth service.
- Cut the initial JS bundle size by about 40% with lazy loading, code splitting and dynamic imports, and removed scroll lag on a large scheduling grid with virtualization.
- Added AI features to the payroll platform: an MCP server exposing leave, calendar and candidate tools to AI assistants, and OpenRouter-backed LLM recruitment features replacing n8n workflows.

Techstuff Private Limited — **Feb 2025 – May 2025**

Frontend Developer Intern — Indore, India

- Built React.js/TypeScript UI components from Figma designs; several are still used in the production component library.
- Integrated REST APIs into existing screens and fixed QA-reported bugs, reducing reopened tickets in later sprints.
- Learned the team Git/GitLab workflow (feature branches, merge requests, code review) and was merging production code independently by the end of the internship.

KEY PRODUCTION PROJECTS

Enterprise HR & Payroll Platform

Internal Business Application (Next.js, TypeScript, NestJS, MongoDB)

- Internal system for leave, attendance, calendar and candidate management; I build and maintain the Next.js frontend and contribute to the NestJS/MongoDB backend.
- Extended the NestJS auth service with a CLI/loopback OAuth-style login flow (authorize, one-time code, token exchange, refresh).

Mercanis — B2B SaaS Procurement Platform

Client Project (SvelteKit, TypeScript, NestJS, MongoDB)

- Core platform used daily by enterprise procurement and supplier-management teams; own features end to end, writing NestJS/MongoDB endpoints when backend work becomes the bottleneck.
- Built a shared component library of 20+ reusable components adopted across every module.

EduMiracle — Student ERP Portal

Personal Project (Next.js 16, TypeScript, MongoDB, Tailwind CSS)

- Built solo end to end (data model, REST APIs, Next.js frontend, deployment) for a real NEET/JEE coaching institute: live attendance, mock test analytics and a CBT exam simulator, deployed on Vercel.
- Designed a role-based admin panel for institute staff.

EDUCATION

Bachelor of Technology in Computer Science & Engineering — **2020 – 2024**

Barkatullah University Institute of Technology (BUIT), Bhopal — **CGPA: 7.89 / 10**
