PRATIK PATIDAR

Full Stack Developer | React.js • Next.js • NestJS • LLM Integration • TypeScript

Indore, Madhya Pradesh, India • pratikpatidar7990@gmail.com • +91 8269647990 • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Full stack developer with around 2 years of experience. Most of my work is frontend in React, Next.js and TypeScript, and I also write backend code in NestJS and MongoDB. I have worked on a procurement SaaS for a German client and on our internal HR and payroll platform, where I also worked on AI features with OpenRouter, RAG and MCP. Based in Indore.

TECHNICAL SKILLS

Frontend:	React.js, Next.js (App Router, SSR), SvelteKit, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux, Context API
Backend & Database:	Node.js, NestJS, REST API Design, MongoDB, Mongoose, JWT Authentication (HttpOnly cookies)
AI Engineering:	LLM Integration (OpenRouter, Gemini), RAG, Model Context Protocol (MCP), n8n Workflow Automation
Testing & Performance:	Jest, React Testing Library, Lazy Loading, Code Splitting, Virtualization, Lighthouse
Tools & Workflow:	Git, GitLab CI/CD, Postman, Jira, Agile/Scrum, Vite, Figma, ESLint, Chrome DevTools

PROFESSIONAL EXPERIENCE

Techstuff Private Limited **May 2025 – Present**

Frontend Engineer (Full-Stack Contributor) Indore, India

- Work on the frontend of Mercanis (SvelteKit) and our internal HR and payroll platform (Next.js), and write NestJS/MongoDB endpoints when a feature needs them.
- Finalise API payloads and validation rules with backend developers before building. Set up JWT login with HttpOnly cookies on both the NestJS and frontend sides.
- Shipped 8+ features through Jira, GitLab merge requests and CI/CD, with QA checking each one before release.
- Helped with the AI features in both products using OpenRouter, and built an MCP server with the official SDK.

Techstuff Private Limited **Feb 2025 – May 2025**

Frontend Developer Intern Indore, India

- Built React/TypeScript components from Figma designs. Some of them are still in the production component library.
- Connected REST APIs to existing screens and fixed the bugs QA reported, so fewer tickets got reopened.
- Learned our Git/GitLab workflow and was merging production code on my own by the end of the internship.

KEY PRODUCTION PROJECTS

Mercanis — B2B SaaS Procurement Platform

Client Project, Germany-based client (SvelteKit, TypeScript, LLM integration)

- Mostly frontend. Built and maintained UI components, including a shared library of 20+ that the modules use.
- Built features in Supplier Management, Contracts, Purchase Orders and Sourcing Events. Cut the initial JS bundle by about 40%.
- Worked with the AI engineering team on AI integration and helped build the Pricing feature that uses an LLM.

Internal HR & Payroll Platform

Multi-workspace product (Next.js, TypeScript, NestJS, MongoDB, OpenRouter, MCP, RAG, LLMs)

- Helped build the ATS workspace from scratch and worked on its AI parts: resume parsing, ATS scoring, job description generation and the AI interview.
- Worked on the HR Bot, a chatbot for the payroll software, and the Attendance Analysis Bot, which calculates employee salary and answers questions about it.
- Worked on moving AI workflows from n8n to OpenRouter-based services in the NestJS backend.
- Built an MCP server with the official SDK so AI assistants can work with app data through our authenticated APIs.

EduMiracle — Student ERP Portal

Personal Project (Next.js 16, TypeScript, MongoDB, Tailwind CSS, Recharts, Gemini AI)

- Built it alone for a real NEET/JEE coaching institute: live attendance, mock test analytics and a CBT exam simulator. Deployed on Vercel.
- Also added an admin panel with roles, and Gemini AI to help students with their doubts.

EDUCATION

Bachelor of Technology in Computer Science & Engineering **2020 – 2024**

Barkatullah University Institute of Technology (BUIT), Bhopal **CGPA: 7.89 / 10**
